120 mm MORTAR IGNITION CARTRIDGE

Built for Excellence

Our 120 mm ignition cartridge is a key component in modern artillery operations. Designed for unmatched performance and consistency, it provides the essential thrust needed to launch a mortar round accurately and efficiently.

Key Advantages:

<u>Aluminum Body Construction</u>	<u>Reliable Operation</u>	<u>Combat-Ready Performance</u>
Crafted from lightweight, corrosion-resistant aluminum, the body of the charge ensures exceptional functionality, enhanced water and fire resistance, and superior mechanical durability in demanding environments.	The aluminum housing ensures stable gas expansion for consistent propulsion under various weather and battlefield conditions.	Engineered for deployment in the most demanding field conditions, making it the trusted choice of military professionals worldwide.

Application:

Our 120mm ignition cartridge is optimized for use with additional propellant increments, enabling it to achieve an extended range of engagements. It integrates seamlessly with standard 120mm mortar fin assemblies.
